## ENVIRONMENTAL POLICY

---

Cherrie Civil Engineering's focus is on having environmentally sustainable projects. Our goals and focus are around sustainability, minimisation and driving an environmental culture that is beyond compliance.

Our approach to environmental management is driven by:

- **Leadership** – Our focus is on all our employees being environmental leaders and setting a level that is beyond compliance. All employees and business partners are responsible for environmental management and our goals are focused around being a market leader in environmental culture.
- **Environmental Systems** – Ensure all environmental systems meet ISO 14001 at a minimum. Our systems focus on sustainability, reduction, reuse of materials and beating project targets where possible and delivering through good governance.
- **Education and Training** – Ensure continual training and improvement of individuals. Our systems is designed to be adaptable and is easily communicated and consulted throughout all our employees and business partners. Our aim is to educate all individuals involved through effective communication channels.
- **Continuous Improvement** – We aim to continually review environmental targets on each project. Our targets will be based on bettering legislative goals or project goals in regards to water, waste reuse and noise, dust and vibration. We will drive environmental sustainability to ensure minimal impact on the stakeholders.

Stephen Cherrie  
MANAGING DIRECTOR
